

ANTIBACTER

MEDICAL SURGICAL PROTECTION REGISTRATION MINISTRY OF HEALTH N ° 20051

SCHEDA TECNICA

FEATURES

Odorless and colorless universal disinfectant cleaner ready for use.

Acts on gram positive bacteria (staphylococcus aureus, enterococcus hirae), gram negative (escherichia coli, pseudomonas aeruginosa) and fungal contamination and mold (candida albicans and aspergillus niger).

Indispensable when it is necessary to clean and disinfect surfaces that must be reused immediately and where it is essential to keep operating times.

The cleansing power, the effective disinfectant action and the absence of caustic alkalis make it suitable for use on all washable surfaces, especially in the food and health sector.

TERMS OF USE

Spray the product evenly on the surfaces, leave to act, remove with paper or microfibre cloth.

Thoroughly rinse surfaces in direct contact with food.
