

Design Frame Parking Post

Large polyamide and steel base plate (dim. 16x23cm) for maximum stability.

One and only attachment point.

Supplied with Torx self-locking screws and plugs

Round shape base plate that protects the post and the car tyres from being damaged.

The lock is situated at the top of the barrier to protect from weather conditions, and so that you don't need to bend over to unlock the barrier.

Automatic closing
